

MAM AIR PURIFIER

MAM AIR PURIFIER - OVERVIEW

It contains the heart (heart) of a mother who wants to protect children's healthy life from harmful environments such as ultrafine dust.

World's first X luxury brand filter X best cost-effectiveness

Due to environmental pollution and numerous reasons, the time has come when we have to live without breathing freely due to fine dust.

The world's first filter contamination level can be checked directly through a real-time window,

The filter management, which is the largest nuclear source of the air purifier function, can be conveniently managed.

In addition, for the first time, it was designed to be used with automobile air conditioner filters guaranteed by luxury automobile brands.

It is the best price-performance product that eliminates the dependence on a dedicated filter.

Now let's breathe comfortably with the Mam air purifier that costs less maintenance without worrying about expensive exclusive filters.

FEATURES

Anti-allergic pre-filter

The pre-filter contains natural green tea extract, catechin, which removes harmful substances like viruses and bacteria to promote safe air circulation.

Corrugated filter

The eco-friendly, high-performance impregnated activated carbon efficiently and removes odors and harmful gases.

Ultrafine dust removal with HEPA filter

H13 class HEPA filter established by the U.S. Environmental Protection Agency is used to filter out more than 99.97% of PM 0.3pm ultrafine dust.

Excellent breathability,

It uses a melt-blown material, which has excellent breathability and filtration efficiency and uses one-third of the pressure compared with conventional fiberglass material.

Beyond perfection,
Triple-layer filter system
